EU Citizen · Nordic work auth.

ICU Nurse · Critical Care & Medical Triage · Berlin

Clinical Assessment · Medical Triage · 24/7 Emergency Coordination · Cross-cultural Care

Clinical Assessment · Medical Triage · Critical Care · Critical Care Nursing · Nordic Relocation · EU Citizen · 4 German ICU Institutions

Seven years of critical care and emergency nursing experience across Germany's leading high-acuity centres, providing a strong foundation for rapid clinical assessment and medical triage. Proven ability to manage complex haemodynamic instability, severe sepsis, and respiratory failure, ensuring patient safety during critical interventions. Highly adaptable through extensive agency deployments, excelling in patient communication under pressure and cross-cultural patient care. Proficient in German (C2) and English (B2), ready to support 24/7 emergency coordination and travel medicine operations.

LICENCES & TRAINING

Exam. Gesundheits- und Krankenpflegerin

State examination, Germany - EU/EEA recognised nursing licence
IAFW Mainburg / Teaching Hospital Pfaffenhofen, 2017

EDUCATION

Exam. Gesundheits- und Krankenpflegerin

IAFW Mainburg / Teaching Hospital Pfaffenhofen a.d. Ilm, Bavaria
2014 – 2017

Mittlere Reife

Paul Gerhard Gesamtschule, Freising, Bavaria
2011

Nordic Career Development

Sep 2025 – Present

Self-directed - Berlin

- EEA nursing licence recognition process for Scandinavian practice; language development (Finnish) to support cross-cultural patient care.
- Targeted preparation for roles requiring critical care expertise, medical assessment, and international healthcare coordination across Norway, Sweden, Denmark, and Finland.

ICU Nurse - Multi-Site Agency

May 2023 – Aug 2025

KCS Medical GmbH & Komorebi Staffing - Berlin

- Rapid integration across multiple ICU teams, protocols, and documentation systems, demonstrating high adaptability for 24/7 emergency coordination.
- Conducted continuous clinical assessment and medical triage across diverse high-acuity environments, managing acute dialysis and transplant care.
- Maintained patient communication under pressure while handling extended clinical scopes including TAVI, Mitraclip, plasmapheresis, and mechanical circulatory support.

ICU Nurse - Cardiac & Transplant ICU (IPS 1)

Jan 2022 – Apr 2023

Deutsches Herzzentrum der Charité (DHZC) - Berlin, cardiac surgical ICU (IPS 1 / WD1i)

- Performed rigorous clinical assessment and advanced haemodynamic monitoring for complex cardiac surgery recovery and transplant patients.
- Provided critical care for cardiac failure and bridge-to-transplant patients, requiring rapid emergency response and multidisciplinary decision-making.
- Delivered post-operative ICU care for heart and lung transplants, overseeing immunosuppression monitoring, infection prevention, and cross-cultural patient care.

ICU Nurse - Charité Campus Benjamin Franklin

Nov 2021

Charité Universitätsmedizin Berlin - Anästhesiologie & Operative Intensivmedizin

- Interim deployment providing critical care for medical and surgical patients, executing rapid medical triage and emergency response protocols.

ICU Nurse - Herzchirurgische Intensivstation

Nov 2019 – Oct 2021

LMU Klinikum Großhadern (Augustinum) - Munich

- Managed ventilated patients with complex respiratory and haemodynamic instability during a 6-month COVID-19 ICU deployment, excelling in patient communication under pressure.
- Provided critical care and continuous clinical assessment for post-operative cardiac surgery and heart transplant patients, including IABP and ECMO/ECLS exposure.

ICU Nurse - Anästhesiologische Intensivstation

Oct 2017 – Oct 2019

LMU Klinikum Großhadern - Munich

- Established a strong critical care foundation managing severe sepsis, polytrauma, and multi-organ failure, requiring immediate emergency response and medical triage.
- Collaborated with interdisciplinary teams to provide complex post-operative care for lung and liver transplant patients, ensuring rigorous infection prevention.
- Administered ARDS management, lung-protective ventilation, and continuous haemodynamic monitoring, adapting to rapidly changing patient conditions.
